Nokia 7 plus android 9 release date

On January 16th, Nokia also released Pie Kernel source of Nokia 8 Sirocco, so custom roms developers can make use of it. The confirmed rollout dates will be posted here, as soon as HMD Global announces them. Nokia 8 Sirocco and 7 Plus devices should receive the Android P Beta 4 in coming days, as part of the program. Nokia 7 Plus and 8 Sirocco devices should receive the official release of Android 9 Pie in a few days as they are partner devices. A few last-minute kinks may still need to be ironed out, but once that's done, you can definitely expect a swift update to a silky smooth new OS, followed by a similar treatment for robust phones like the Nokia 8 Sirocco, 6.1, and 6.1 Plus. After Google Pixel and Pixel 2 devices, Nokia 7 Plus becomes the first phone to get Digital wellbeing support. Some users may think that Google followed the Apple's iPhone X interface in Android 9 Pie. So most likely in mid or late September 2018, the Nokia 8 Sirocco flagship and Nokia 7 Plus devices will start receiving the upcoming android update. With app timer, the time spent by user on the specific app could be limited. The feature may get enhanced further in forthcoming updates. Winddown feature is for the users who excessively use smartphone before going to sleep. Update on 18/1/2019 : After the rollout of Pie for Nokia 8, HMD Global begins the rollout for its flagship Nokia 8 Sirocco on January 9th. The next major update for the flagship is Android Q only, which is currently under development at full pace. More Check out 9to5Google on YouTube for more news: tech2 News Staff Aug 25, 2018 11:47:10 IST Ever since HMD Global decided to be a part of Google's Android One program, Nokia smartphones have been the fastest when it comes to software updates. Update on 26/9/2018 : HMD Global has released another beta of Pie for Nokia 7 Plus which brings the Digital wellbeing support and other minor fixes. At the I/O 2018, Google announced that along with Google Pixel lineup, Nokia 7 Plus is also included in the Android P Beta program. The back button appears only inside apps when needed and disappears later. Too bad the Snapdragon 660-powered Nokia 7 Plus is not officially available stateside. So the opted Nokia 7 Plus users started receiving the Android P beta build since the launch of Beta. Nokia 7 Plus. Improved Battery Saver Google made some improvements to the stock battery saver feature which was arrived with Android Lollipop back in 2014. Shush Mode This is an addition to the Do not Disturb feature which also helps to reduce smartphone addiction. Till now, the Battery saver disables itself after plugging in, but after plugging off, the user must re-enable it manually if wanted. Update on 25/7/2018 : The Search Giant released the Android P Beta 4 aka DP5, a few hours ago. Because of the Project Treble of Oreo implemented in Nokia flagships, future updates will be delivered quickly and also much easier for the manufacturer and also carriers. Upcoming events are again displayed on the Lockscreen, the feature was disable in the earlier preview. Most likely, shortly after 7 Plus, the rollout may spread to 8 Sirocco too. The beta users still figuring out how much battery, the new interaction of android is going to save, so in coming days more details about the Adaptive Battery feature will be revealed. So in a few days the Nokia 7 Plus and 8 Sirocco users will receive the Android Pie official build. Till now, the Pie rollout has begun in many regions in full scale. We have received multiple reports from Nokia 8 Sirocco users that they have got Pie update notifications. The flagships came with Android 8.0 Oreo out of the box and the next major update for these devices is Android 9 Pie. Adaptive Battery This is one of awesome features of the Android P Beta which reduce battery drain even upto 30 percent, according to Google. Albeit, it contradicts with the Google's Advertising and benefits, it seems that Google aimed at healthy smartphone usage. So user doesn't need to go through the Settings app to re-enable the battery saver after charging. Now the rollout of final build is coming to 7 Plus in September. Finally, HMD Global managed to pushout stock Android Pie without any known bugs for Nokia 8 Sirocco users. Albeit, the beta is available for Nokia 7 Plus, it isn't recommended for daily usage and the flashing of Beta is also a tedious process. Receiving the update next month would also make the Nokia 7 Plus the first smartphone with a Snapdragon 660 SoC to rock a stable build of Android Pie. The major changes in the DP5 yet to be revealed. Lockdown Mode The Android Pie update come up with a new feature named as Lockdown to tighten security on Nokia 7 Plus and 8 Sirocco devices. Nokia Android Software updates Aug 21, 2018, 5:03 AM 5 The heavyweight champion of timely Android Oreo updates (Google obviously notwithstanding) fully intends to keep up the pace and leave no phone behind when it comes to Pie adoption as well. During a press event in India, where the notch-toting Nokia 6.1 Plus and 5.1 Plus with Android One started their proper global expansion earlier today, Sarvikas confirmed the official Android 9 Pie rollout for the Nokia 7 Plus is scheduled to begin sometime next month. While there's no firm release date to share just yet, odds are you won't have to wait more than a few weeks, considering the 6-inch handset's beta tests have been underway for quite some time, nearing a successful conclusion. Like so many other Nokia-branded products, the 7 Plus is an Android One participant, running close-to-stock software, which means HMD doesn't have a lot of customizing or optimizing to do. Clearly, though, something went wrong that required just a bit more testing before rolling out a final release. It changes the display to greyscale automatically and reduces eyestrain and sleep problems. Only whitelisted contacts can get through Shush mode in case of emergencies. As this is a phased rollout, Nokia 7 Plus devices throughout the World will be updated to Android 9 in phases. The official rollout dates of Pie will be revealed soon. Gesture based Interface The Gesture based interface is a new feature which totally revamps the navigation bar, as the previous leaks revealed. A few days ago, the company starts the rollout of Beta 4 build of Android 9 for its mid-ranger. Now in Android P Beta, the Battery Saver itself turning back on after removing the charging cable, which is really awesome. There many UI changes in the Android P DP4, background fill has been removed from icons in Quick Settings and Media volume controls. Previously, the Nokia 8 Sirocco and 7 Plus devices joined the Android Enterprise Program, so will receive atleast two major Android updates, Android P and Q. Update on 22/8/2018 : HMD Global has confirmed that the Nokia 7 Plus mid-ranger will get the official Android 9.0 Pie update from the next month. We do not have a timeline yet for when other Nokia devices are getting the update but knowing Nokia's usual speed in pushing out updates, we should expect a number of smartphones to be updated to Android Pie before the end of the year. The Nokia 7 Plus was one of the first Android phones to get an Android 9 Pie beta, but it still hasn't received a final version. The Pixel and Pixel 2 device owners are getting the Android Pie update through OTA and flashing factory images. When will Nokia 8 Sirocco and 7 Plus get Android 9 Pie ? Other changes in DP4 include Call volume slider in Sound Settings, New gesture navigation slider and New back button. The update's change log mostly relates to features added in the previous Beta v4 update which Nokia said was going to be the last beta before a final release. The app timer and winddown are two main features of digital wellbeing. The confirmed rollout dates will be revealed very soon. To use split screen or multitask, users just swipe up on the screen as there will be no App previews button in the upcoming update. To use the Lockdown feature, user just have to tap on the Enter Lockdown option in the Powermenu. The update was scheduled to rollout in late-November but keeps postponed due to some technical problems. Dave Burke, the VP of Android Engineering suggested in his blog post, the developers should make their apps ready for Android P. HMD Global has announced recently the rollout for the Nokia 8 Sirocco and 7 Plus devices will begin September and the update will bring the ARCore support for Nokia 8 Sirocco flagship. Any how, Nokia 8 Sirocco and 7 Plus devices will get a new navigation bar with only pill-shaped home button with the Android Pie update. HMD Global announced the Nokia 8 Sirocco and Nokia 7 Plus at MWC 2018 in February and released in April 2018. However, the company hasn't shared any details about the rollout for its flagship, Nokia 8 Sirocco. It seems that the fourth preview of Android P is very near to final version and stable enough. It's unclear if anything has been changed under the hood, but some users note that an "At a Glance" widget has been added to the homescreen (and isn't removable), aptX is now enabled, and the WiFi status icon now shows the up and down arrows. Update on 9/10/2018 : HMD Global announced about a week ago that the company is going to start the Pie rollout officially with Nokia 7 Plus mid-ranger. According to the official statement, Nokia 6.1 and 6.1 Plus mid-rangers stand next in the line for Android Pie. The VP of Android Engineering, Dave Burke, told at I/O 2018, Adaptive Battery feature works with on-device machine learning and identify which apps the user going to use in coming hours and the apps which are not going to be used and reduce CPU wake-up calls. While that was expected to come next in line, the most recent update has delivered yet another beta... Nokia sent out what was supposed to be the final beta version of Android 9 Pie to the Nokia 7 Plus earlier this month, but now a slight update to that update is being rolled out. Update on 15/07/2018 : Google released the fourth preview of Android P on July 2nd and we dugged deep into its features. What's new in Android Pie ? In this month only, these mid-range devices will start receiving the Pie update. The key features in first developer preview, which was released in March, include Call recording, Notification, Improvements to Picture mode, Screenshot button and markup editor, Indoor Navigation using Wi-Fi RTT and new Volume slider. The option appears with different UI than the remaining options in the Menu, so we can easily identify it. The Search Giant released the Ninth major iteration of Android officially on August 6th with the codename Pie and version number 9. Confirmed rollout dates of the Pie update are yet to be revealed but the tech analysts expect the rollout in the first or second weeks of September. Hopefully, Nokia will roll out the final Android 9 Pie release for the Nokia 7 Plus fairly soon. The public release of Android P could come in third Quarter of 2018, most likely in early or mid-August. Digital Wellbeing At Google I/O 2018, the Search giant explained the features in Android P to deal with the problem of excessive smartphone usage and named them as Digital Wellbeing. In the mean time, we will know more about the official codename of Android 9.0. Update on 7/8/2018 : Yesterday, the Search Giant released the Android P official version with codename Pie, the version number is 9 not 9.0. Previous rumours claim that Android P would come on August 20th, but Google decides for an early release of Android. In the last month, HMD Global's Chief Product Officer Juho Sarvikas announced that the global rollout of Android Pie officially begins in September. Although the feature is still in beta stage, it will be finalized soon. Then, in November, the flagships Nokia 8 and 8 Sirocco will get the Android 9 Pie update. The simplified Gesture interface will also reduce the screen burn-in due to navigation buttons in the Nokia 8 Sirocco flagship which sports pOLED display. By using the lockdown mode, user can disable the fingerprint unlocking mechanism in the device and thereby prevent forceful unlocking and other means. So users have to wait till the official rollout of the Android Pie update through OTA to enjoy the new features of Android 9 Pie. When the user puts the device face down, Shush feature gets activated and enables DND automatically, so notification beeps, pings and calls. More on Nokia: Check out 9to5Google on YouTube for more news. FTC: We use income earning auto affiliate links. After enabling the Lockdown mode, user has to use other unlocking systems like PIN, password or pattern to work the device again. The Beta under version 4.1 released few days ago and rolling out to the registered beta users. The latest iteration of Android seems to be very stable and free from bugs. The flagship users are currently on Android 8.1 Oreo and waiting for Android Pie. The parent company of Nokia is now trying to keep up with their promise of releasing Android Pie to all their phones and according to a fresh report, Chief Product Officer Juho Sarvikas has confirmed that the Nokia 7 Plus will get a stable release of Android Pie next month. The size of the update is about 1.4 GB and also includes December's Security patch. In the Beta cum second preview of Android P, Google added many revolutionary features, which are Adaptive Battery and Brightness, Gesture-based interface, App actions and Digital Wellbeing. The latest Beta is very stable and near to the final release. The factory images of DP5 are available for Google Pixel and Pixel 2 series devices and the OTA rollout also begins. To run a quick recap, the Nokia 7 Plus was also one of seven devices in the third-party Android beta program and received the Android Pie Beta 4 build just earlier this month.
